FOUNDERS' MEMORIAL GATE

f o r e w o r d

The Illinois Wesleyan gates symbolize to thousands their own adventurous quest for the true, the beautiful and the good, — in the loved past, in the golden present, or in the beckoning future.

The early settlers of Illinois who founded this University bequeathed to their descendants the adventurous spirit of the pioneer, — a spirit caught up and transmitted in youthful enthusiasms, and throbbing to-day in the ever-renewed life of the campus.

This catalog is a record of the current of life at Illinois Wesleyan. It is a handbook for the assistance of all who associate themselves with the work of this institution as it moves toward the new day in higher education.

History and

The early history of Illinois Wesleyan University is that of earnest hope and eager vision, realized in sacrifice gladly offered for the advancement of the kingdom of learning and the kingdom of God.

Founded in 1850, its first announcement was signed by thirty trustees representing several of the leading families of McLean county and Central Illinois. Among other distinguished men who founded this institution were Judge David Davis of the United States Supreme Court, intimate friend of Abraham Lincoln, and the Reverend Peter Cartwright, nationally known as a successful pioneer Methodist preacher during the earlier years of the statehood of Illinois. Many of these families have continued prominent in public affairs and have been consistent and loyal supporters of the University throughout its entire history. Ever since its establishment the University has been under the patronage of the Illinois Conference of the Methodist Episcopal Church.

The first full year of school work opened in October, 1851, the enrollment that year totaling one hundred thirty-five. The first work was conducted in rooms rented in the city, the central portion of the present main campus being acquired in 1854. The first president, Clinton W. Sears, was elected in 1855. Hard days were just ahead. When Oliver W. Munsell, second presi-

dent, took office in 1857, Old North Hall remained only partially completed, funds were exhausted, and the nation was in the grip of a hard financial crisis. In those dark days President Munsell himself advanced the money for the completion and furnishing of the building. Before the end of his sixteen years in office he had the satisfaction of seeing Hedding Hall erected (1870) at a cost of one hundred thousand dollars.

President Munsell was followed by Samuel Fallows (1873-1875) and William H. H. Adams (1875-1888). During the presidency of William H. Wilder (1888-1898) the athletic field was acquired which now bears his name. Edgar M. Smith (1898-1905) and Frank G. Barnes (1905-1908) were followed by Theodore Kemp (1908-1922), whose administration was marked by the purchase of Kemp Hall, a residence for women, and the building of Science Hall and Memorial Gymnasium. Steps had already been taken toward the erection of Buck Memorial Library when Dr. William J. Davidson began a most fruitful decade (1922-1932) in the office of president, — a period marked by the erection of Presser Hall and significant advances in the curricular work of the institution. Dr. Harry Wright McPherson assumed the responsibilities of president in 1932.

Music instruction was begun in 1871, under the direction of Professor Harvey C. DeMotte, later vice-president. As it developed, most of this work was carried on in downtown studios until 1919, when a transfer to the main campus was effected and the School of Music reorganized as an integral part of the University. These changes were followed by the remarkable expansion of recent years.

Hedding College United with Illinois Wesleyan. The same period of zeal for education which prompted the establishment of Illinois Wesleyan led also to the founding of a college in Abing-

don, Illinois, first as a seminary for women and later as a co-educational college. It was named Hedding in honor of Elijah Hedding, the eighth bishop of the Methodist Episcopal Church.

President N. C. Lewis was the first executive (1856-1858) and was worthily succeeded by J. T. Dickinson (1858-1868), M. C. Springer (1868-1872), J. G. Evans (1872-1878; 1889-1898), G. W. Peck (1878-1882), J. S. Cumming (1882-1886), J. R. Jacques (1886-1889), H. D. Clark (1898-1900), U. Z. Gilmer (1900-1902), H. B. Gough (1902-1907), W. P. McVey (1907-1911), W. D. Agnew (1911-1919), W. W. Bollinger (Acting, 1919-1920), C. W. Green (1920-1922).

The closing of Hedding as a degree granting college was not unlike that of other worthy institutions which could not withstand the economic pressure of the World War. The last class to receive the bachelor's degree was graduated in 1922.

In 1928 the alumni of Hedding were adopted by Illinois Wesleyan University and in 1930 an arrangement was entered into whereby the endowment and annuity funds of Hedding were to be transferred to Illinois Wesleyan to assist in carrying on the work of Christian education to which both institutions had so earnestly devoted their resources. The principal recitation hall on the Illinois Wesleyan campus was promptly re-christened "Hedding Hall" in honor of the union. More recently the Illinois Wesleyan student body sponsored the erection of a monument, upon which is suitably mounted the old Hedding College bell, which called so many generations of students to their classes. Thus is preserved for future generations the memory of an Alma Mater which won the love and loyalty of so many men and women who have blessed the world with their dedicated lives.

Organization. Illinois Wesleyan University comprises three schools and colleges—the College of Liberal Arts, the School of Music, and the School of Nursing. All are under the management of the same Board of Trustees, and the President of the University has general supervision over all. The internal organiza-

tion provides for the extra-curricular and social life of the student, as well as a curricular experience along progressive lines.

Illinois Wesleyan University is a Christian institution, under denominational patronage, but free from sectarian bias in teaching and administration. Several Protestant denominations are represented on the faculty, and young people of almost every prominent religious faith are enrolled as students.

The scholastic standards of Illinois Wesleyan have been recognized as unusually high, after careful inspection by competent educators. The University has been accredited by the North Central Association of Colleges and Secondary Schools continuously since 1916. The University holds membership in the Association of American Colleges and is accredited by the University Senate of the Methodist Episcopal Church. Ratings of approval are likewise accorded by the American Association of University Women and by the University of Illinois, which awards to this institution annually a scholarship for graduate study. Graduates of Illinois Wesleyan pass without difficulty into the graduate schools of the University of Illinois, Northwestern University, the University of Chicago, the University of Wisconsin, Columbia University, and other institutions maintaining notable graduate schools.

The School of Music holds membership in the National Association of Schools of Music, a standardizing agency which maintains the strictest standards in force among university schools of music in America.

Objectives of

Illinois Wesleyan has dedicated itself to the broader conception of education as including the cultivation of the whole life of man, — the spiritual as well as the mental and physical, the institutional and broadly social aspects as well as the individual.

No youth can cease to be a stranger in the world in which he lives, until he has made his own fortune in the wealth of knowledge which yields a comprehension of that world. But the changing world of our time has made more apparent, what has always been true, that equal or even greater importance must be attached to the mastery of methods and processes for the discovery of new facts. The intellectually well furnished man will also search for the relations existing among his facts, so that he may find light and guidance from the interpretation of their real meaning and significance for life. It is the aim and purpose of the College of Liberal Arts to surround the youth who is able and willing to profit from the journey with trained guides and that stimulating atmosphere so essential for the intellectual discovery of new worlds within the old. A lifetime is too short to explore all of them thoroughly, but it is the privilege of a college course to go far in one or two directions. At the same time one should secure an overview of the whole that will guard against narrowness of outlook and secure the perspective for sympathetic appreciation of the tasks other men perform.

Memorial Gymnasium—Scene of many exciting contests, both inter-collegiate and intramural.

the College

Such is the intellectual purpose and function of this college. It is not regarded as inconsistent with this purpose that the college offer certain vocational courses, in such fields as chemistry and general business administration, where a limited number of additional courses will meet the needs of considerable numbers of students, without jeopardizing either the student's opportunity for a liberal education or the ability of the college to fulfill its chief function.

An important objective is the development of a sound body, through instruction in the principles of healthful living, through establishing habits of regular exercise, and through a sane program of athletic sports, both intramural and inter-collegiate.

An education of the body and intellect only is truncated and partial. That person is rich who glows in the presence of beauty as found in art, whose mind is attuned to the harmonies of great music. That person is worth while who is sensitive to the needs of others and who is possessed of that co-operative good will so indispensable for the building of a righteous society. That person is truly alive who is aware of spiritual forces undergirding his tasks and lending zest to the experience of every day. These are the greatest values and to their realization in the lives of generation after generation of our youth we dedicate the powers and resources of our institution.

The New

Early in 1932, the Faculty inaugurated a program of thoroughgoing revision of the curriculum. The changes called for are being introduced step by step but the new curriculum will be in full effect by the year 1937-38.

A significant change is the organization of two levels of instruction, each of which will make its own contribution to the rounded whole of the student's four-year course.

Underclass Studies. The series of survey courses in the Natural Sciences, Social Sciences, and the Humanities, enables the student to round out his general stock of knowledge and take his bearings in the world of learning. It is designed to orient the student in the world of modern life and lead him to appreciate the heritage bequeathed to the present from the past. Whole areas and systems of that heritage almost inevitably remained untouched under the older group requirement system.

Along with the surveys, the student will ordinarily pursue a course in the Department of Religion, and a series of courses which lay the groundwork for his future field of major interest and related studies.

In most cases, further work in English Composition is needed to enable the student to use the English language with effective skill. If he has reached such proficiency he may be excused; if he needs longer training than the average, he will receive it. A report will be made by every instructor on the student's use of

his mother tongue. Wesleyan proposes to train its students for clear and forceful expression.

It is in line with this same emphasis on the effective use of knowledge that all foreign language requirements are stated in terms of proficiency. For example, many departments require a reading knowledge of a modern language.

No single term can begin to answer all the significant questions which relate to a student's work in a particular course. The student, his parents and his adviser, all have an interest in a more inclusive report. Students pursuing courses designed for underclassmen will hereafter be given ratings by each instructor on the following significant points: preparation, application, co-operation, initiative, reasoning, expression, and achievement. The rating in achievement can be readily translated into the conventional grade for credit transfer purposes, although we believe the rating plan as here employed to be far more significant.

Upperclass Studies. Before the student is admitted to upperclass studies, he must present a tentative outline, showing the courses he expects to offer in fulfillment of the requirements for the bachelor's degree. He must give evidence to the Committee on Upperclass Studies of his ability to do work of an advanced character in the studies of his field of concentration.

The work of the upperclass level is designed to place more responsibility upon the individual student and in so doing to develop in him a larger measure of independence in study. The seminar and individual conference types of instruction give the student excellent opportunities to develop techniques for the organization of data drawn from various and sometimes conflicting sources. Such courses will be included in the program of every upperclass student.

The principal task of the last two years is the mastery of an area of concentrated study or a subject of major interest. This is conceived to be one task, not a group of isolated tasks. The completion of courses as such is subordinate in importance to the attainment of competence in the field as an organized whole, as shown by the senior examination. It is organized knowledge which gives its possessor the power of accomplishment, and it is that which the world demands of our graduates.

Illinois Wesleyan

The University is located in one of the most beautiful cities of the state, affording the student practically all the advantages of urban life without the influences which in many cities tend to demoralize young life.

Bloomington is a city of cherished traditions. To this place came Abraham Lincoln regularly to practice in the circuit court. Here was delivered his famous "Lost Speech." Nearby is the birthplace of Elbert Hubbard and that of Richard Hovey, the poet.

As a center of musical and literary activities, Bloomington has a reputation of long standing. The Amateur Musical Club, an organization which has operated over thirty years, brings to the city each year a number of the world's greatest artists and musical organizations. The Bloomington Philharmonic Society, through its great chorus and orchestra, also provides concert advantages of great value to students.

Additional privileges are offered through the lectures and exhibits of the Bloomington Art Association, the Withers Public Library, and the museum of the McLean County Historical Society. The Community Players and the dramatic guilds of several of the churches offer excellent productions. The Consistory Players have over a period of a dozen years attracted annually to the city thousands of visitors for the series of presentations of

a Cultural Center

the Passion Play. Several of these organizations have reduced membership rates for students to bring their cultural advantages within reach of all.

Within the University itself one finds wide opportunity for participation and enjoyment. Public recitals are given frequently in Presser Hall by members of the faculty and advanced students. The large University Chorus studies and presents publicly only the finest choral and operatic works. The University Orchestra affords opportunity for qualified students to work on the best orchestral literature. The University Band is one of the best small university bands in the Middle West. Its annual presentation as a concert band has become an outstanding musical event. The Apollo Club and the St. Cecilia Club study glee club music and are presented in annual concerts or on tour.

The A Capella Choir is made up of forty-five selected voices, and gives annually a Christmas Carol Program and a program of music appropriate to the Easter season. The Choir is called upon to give concerts throughout the state at various times during the college year, in addition to its participation in the annual Church Music Conference and its radio broadcasts.

A String Ensemble of about twelve pieces is maintained which gives annually a concert in Presser Hall, and which also gives

several concerts throughout the state at various times during the year. This string ensemble reads through the finest chamber music and has been commended by nationally known musicians as one of the finest of its kind in existence.

The Theta Alpha Phi and Masquers organizations are very active in the dramatic field, offering dramatic experience under most competent direction. In addition to three or four full length plays each year, there are frequent programs of one-act plays sponsored by the Masquers. Participation in dramatics is open to every student in the University, whether or not he is taking special drama courses.

The University Lecture and Concert Course brings to the campus men and organizations of outstanding merit,—famous travellers and lecturers, experts in various specialized fields, outstanding men in the professions, nationally known musicians and musical organizations. A list of the lecturers and entertainers appearing in recent months is found elsewhere. The reader is referred to the Table of Contents.

For practically all these University functions, admission is included in the regular schedule of fees, thus bringing these cultural advantages within the reach of every student. In this as in the rest of its program, it is the aim of the University to offer its cultural advantages at a very moderate cost, considering the standard of faculty training, the modern curriculum, the library and research facilities, and the comfortable living accommodations.

The East Gate, near Presser Hall, extends a cordial, yet dignified welcome to the campus visitor.

College of Liberal Arts

The College of Liberal Arts offers courses of instruction leading to two degrees, the Bachelor of Arts, and the Bachelor of Science. The two courses are equivalent in the quantity and quality of work required; both are cultural and designed to give a liberal education. A candidate for the A.B. degree will choose his field of concentration from Division I or III. A candidate for the B.S. degree will choose his field of concentration in Division II. However, a student whose field of concentration is in Division III, with major interest in certain departments of that division, may become a candidate for the B.S. degree, upon recommendation of the head of the department. Students with major interest in mathematics with a second sequence in Division I or III may become a candidate for either the A.B. or B.S. degree.

ADMISSION TO COLLEGE

By action of the Board of Trustees, the freshman class is limited to two hundred in the College of Liberal Arts.

All candidates for admission must offer satisfactory evidence of good moral character, and those coming from other colleges must present evidence of honorable dismissal.

The scholastic requirements for admission may be met in any of the following ways:

1. The presentation of credits totalling fifteen acceptable units of high school or other secondary school work, including the prescribed subjects listed herewith.

2. Candidates for admission who have been graduated from an accredited high school will be admitted to freshman classification, but any deficiencies in prescribed units must be made up during the first two years by electing appropriate courses for which college credit will be given only if the work is of college level. If more than five of the fifteen units are from the second group of elective subjects, such deficiency must be made up by courses taken in addition to the regular underclass studies.

3. Candidates who do not present certificates of preparatory work will be examined upon the work required for entrance.

Prescribed Subjects

English	3 units
Algebra	1 unit
Plane Geometry	1 unit
Laboratory Science	1 unit
History and Social Science	2 units

Elective Subjects

Any of the following subjects will be accepted as electives; but the numbers indicate the maximum amount of credit that will be allowed for each subject:

Advanced Algebra	1	Greek	1 to 3
Astronomy	$\frac{1}{2}$ or 1	History	1 to 4
Botany	$\frac{1}{2}$ or 1	Latin	1 to 4

From the following group of electives only five units will be accepted and counted towards entrance:

Agriculture	1 to 3	Drawing, Mechanical	$\frac{1}{2}$ or 1
Bookkeeping	1	Home Economics	1 to 3
Business Law	$\frac{1}{2}$	Manual Training	1 or 2
Commercial Arithmetic	$\frac{1}{2}$	Music	1 or 2
Drawing, Art and Design	$\frac{1}{2}$ or 1	Shorthand and Typewriting	1 or 2

Secondary schools accredited by the University of Illinois, and by the North Central Association of Colleges and Secondary Schools will be accredited by Illinois Wesleyan University. Students in schools not on these accredited lists may by correspondence with the Registrar of Illinois Wesleyan University learn on what conditions they may be admitted by this college.

Candidates for admission must present certificates of preparatory or high school work before coming. The certificates should be sent by mail to the registrar at least two weeks before the opening of the academic year.

The Registrar may at his discretion accept credit in other subjects provided the work has been done in a manner approved both as to quality and quantity. But it is required that the work to be accepted for admission must have stable educational values and serve as a fitting preparation for further study.

Admission to Advanced Standing

Students from other accredited colleges will be admitted to advanced standing on presentation of certificates of honorable dismissal and acceptable grades, their classification being determined by the credits to which they are entitled.

UNDERCLASS STUDIES

The course of study for underclassmen includes the following:

1. Unless released by the Department after placement tests, all freshmen are required to register for a three-hour course in English Composition, extending throughout the year, a total of six semester hours. The nature of the course is adapted to the needs of the student. Students who fail to manifest an ability to use the English language acceptably in the written work of any of their courses may be required to do additional work in English Composition, without credit, until such deficiency is remedied.

2. A survey course must be completed covering the work of each of the divisions, except that each division may determine whether students choosing that division as their field of concentration are to be required to complete the survey course of that division. In the case of a student transferring from another institution, the Dean and Adviser are authorized to make such adjustment of the survey requirement as will conform to the spirit of this requirement.

3. One three-hour course in religion.

4. Two year-courses in physical education.

5. In addition to the above, not less than three year-courses or their equivalent must be completed in not less than two different departments.

6. Electives to complete a total of sixty-four semester hours. In choosing electives the student who expects to be admitted to candidacy for the bachelor's degree should consult the statement relative to underclass studies under the Division in which he expects to choose his subject of major interest.

In addition to English Composition and Physical Education, the freshman student must choose* at least two subjects from the survey courses, foreign languages, mathematics and natural sciences, unless excused by the Dean on written recommendation of his adviser.

ASSOCIATE OF ARTS CERTIFICATE

A student who has satisfactorily completed his underclass studies may be granted the Associate of Arts Certificate, upon recommendation of the Faculty and the payment of the required fee.

ADMISSION TO UPPERCLASS STUDIES

Admission to upperclass studies includes admission to candidacy for the bachelor's degree. The student desiring such recognition will during the second semester of his sophomore year make application to the Committee on Upperclass Studies on a form obtainable at the Registrar's office. Any student who has completed sixty semester hours of college work must satisfy the Committee on the following items before enrolling for any further work.

1. Satisfactory completion of two years (at least sixty semester hours) of work in a recognized institution of higher learning.
2. Evidence of ability to do work of an advanced character in the Division in which he chooses his Field of Concentration.
3. Presentation of a tentative outline of upperclass studies, showing the courses he expects to present in fulfillment of the requirements for the bachelor's degree.

UPPERCLASS STUDIES

Before a student can be recommended by the Faculty for graduation with the bachelor's degree, he must complete the following requirements:

1. A total of 124 semester hours for the four years of college work.
2. A student whose underclass studies have failed to provide the equivalent of the work outlined under that heading will be required to make up the deficiency by the use of his free electives. Any such deficiency must be made up one full year before a degree is conferred.
3. He must meet the foreign language requirements of the department which includes his subject of major interest. Unless otherwise

specified in the departmental description, this includes not less than one year of foreign language in college and demonstration of ability to read one modern language.

4. He must complete C-courses and D-courses, totalling not less than thirty-six semester hours, unless exception is made by the Committee on Curriculum.

5. A Field of Concentration of not less than forty semester hours must be completed, including sequences of not less than fifteen to twenty semester hours in each of two departments. The required minimum sequence is described in detail under each department. Not more than forty semester hours in any department may be counted toward a degree. Not more than sixty-four semester hours in any two departments, nor more than seventy-two in any three departments may be counted toward a degree. In the case of a student transferring from another institution, at least five semester hours of the work accepted in the department of major interest must be done in residence in this college. In no case may more than six semester hours of the forty in a field of concentration be below "average" in quality.

The field of Concentration is normally made up of courses within the same division, but on recommendation of the adviser, not later than the beginning of the senior year, the Committee on Upperclass Studies may approve a special field of concentration to suit the individual needs of a particular student. Such a proposed field of concentration may be made up of courses in more than one division, but it must form a unified and significant body of knowledge.

History may be counted for a field of concentration in Division I, without special action.

The field of concentration must include at least one sequence outside the following departments: Art, Education, Music, Physical Education, and Speech. A total of not more than forty hours in Art and Music may be counted toward a degree in liberal arts.

After the student is admitted to upperclass studies, any variation in his proposed field of concentration involving a change from one department to another must first be approved by the Committee on Upperclass Studies.

6. The demonstration of ability in a senior examination, designed to test the student's powers in organizing the knowledge of his subject of

major interest and his ability to marshal the best available data toward the solution of problems in that field. (This provision will apply to all departments after June, 1937.)

ELECTIVES

The following privileges and regulations govern the system of free electives:

The normal quota of hours of class work per week is fifteen or sixteen. An increase to seventeen or eighteen hours may be approved by the student's adviser, provided all his work in the preceding semester was as high as "average" and at least one course "above average." Any additional increase requires formal approval of the Deans acting as a committee, and consent will not be given in such cases, unless all the student's work in the preceding semester was "above average" or "superior."

Seniors may enroll for courses open to freshmen only upon written consent of the instructor. They may be required to do additional work to receive the stated amount of credit.

No student may enroll for a D-course without the written consent of the instructor.

No student shall receive credit for part of a catalogued course. The student shall not be given credit for other than catalogued courses, except by special action of the faculty.

The College reserves the right to withdraw any elective course announced for a given semester, provided that fewer than five students elect it. Likewise it has the right to limit the number who may elect any course offered where the course is unduly crowded.

After securing the bursar's name on the registration card, a student is not permitted to make any change in his work except with the consent of the adviser and action of the registrar. All such changes must be made within the first two weeks of classwork. Any study dropped after the end of the second week will be recorded as Wdn. or "No credit." See "Marks."

HONORS COURSES

Upon nomination of the faculty, seniors of high scholarship, with major interest in certain departments, will be permitted to enroll for an honors course, which will carry a limited number of credit-hours toward graduation. A candidate for graduation so enrolled will be given a

comprehensive examination covering the entire subject of his major interest and upon successful completion of the work will be awarded honors at graduation.

EXAMINATIONS

Written and oral tests are given from time to time during the semesters, at the option of the teachers. At the close of each semester a written examination of two hours is given in each course.

Students who are absent from semester examinations will be granted special examinations at specified times, but an extra charge will be made for every such examination, unless the faculty is convinced that the absence or failure was not due to culpable negligence.

HONESTY IN COLLEGE WORK

In all of his relations to the University and the community in which it is located, every student is expected to exhibit the moral quality of honesty. This quality of character is required of students in all classes and in all examinations. Discovery of dishonesty or cheating in any part of the course, in class work or in examinations, is regarded by the administration as sufficient cause for dropping any student guilty of the same from the rolls of the University.

MARKS

At the end of each semester a report is sent to the Registrar by each instructor, rating the student in respect to his preparation, application, cooperation, initiative, reasoning, expression, and achievement. Each factor is rated on a five-point graphic scale: "superior," "above average," "average," "below average," and "very poor." For transfer purposes, the achievement rating is recorded on the Registrar's record as A, B, C, D, or F, no credit being allowed for work marked "very poor" (F). The entire report is filed with the personnel records of the student and a copy is sent to the parent or guardian. (When the new curriculum is in full operation, these ratings will be given only in courses designed for underclassmen.)

A mark of "Condition" indicates a lack of quality of work or late work not due to an emergency. Work reported as Con. may be changed on the Registrar's books to a mark not higher than D, if satisfactorily completed within one year; otherwise the mark becomes F. No change

of Con. to a higher mark may be made earlier than the fourth week of the following semester. "Incomplete" indicates a lack in quantity of work due to illness or other emergency. Work reported as Inc. may be raised to any mark, in the judgment of the instructor. "Withdrawn" indicates that the student withdrew from the course while doing satisfactory work. If a student withdraws from a course while failing, a mark of F is recorded.

A mid-semester report is made on the work of all students whose achievement is below the rating of "average."

CLASSIFICATION OF STUDENTS

All students in the College of Liberal Arts are classified as follows:

1. *UNDERGRADUATE STUDENTS*: Those who are regularly admitted to the College of Liberal Arts and who are candidates for the baccalaureate degree.

Freshmen: Students who are enrolled for not less than thirteen semester hours, including English composition and physical education.

Sophomores: Students who have at least twenty-six semester hours to their credit, including six hours of English composition, and who are taking the required sophomore work in physical education.

Juniors: Students who have no special freshman or sophomore requirements pending and who have at least sixty semester hours to their credit. At least thirty-six of the sixty semester hours must have been completed with a mark of "average" or above.

Seniors: Students who have at least eighty-eight semester hours at the opening of the first semester of the year will be ranked as seniors, provided they have completed all the required survey courses or their equivalents and provided they will be able to complete all the requirements for graduation during that academic year.

II. *UNCLASSIFIED STUDENTS*: Those who are not included in any of the above groups but who give evidence of ability to pursue with profit the course or courses for which they enroll.

Expenses

The following does not include clothing and personal expenditures, as these vary so greatly that no proper estimate can be made, but these figures give a fair idea of the regular expenses for the school year of thirty-six weeks. It may be said, however, that many students get through on less than the least mentioned, because of the fact that they earn all or a part of their board and room.

	Low	Moderate	High
Tuition	\$180	\$180	\$180
Student Activities fee.....	26	26	26
Laboratory fees	6	24	36
Board	126	180	235
Room	45	63	90
Laundry	20	25	35
Books	16	21	26
	<hr/>	<hr/>	<hr/>
	\$419	\$519	\$628

TUITION AND FEES: These figures apply only to work taken in the College of Liberal Arts. The expense of instruction in the School of Music will be found in the section devoted to that school. The Student Activities fee is paid by the students of all schools.

Tuition for thirteen to sixteen hours, per semester.....\$90.00
 For each additional hour above sixteen, per semester.... 6.00
 Student Activities fee, per semester..... 13.00

For less than thirteen hours, charges will be as follows:

*Tuition, each semester hour..... 6.00
 Student Activities fee, per semester..... 13.00

The payment of the Student Activities fee entitles the student to a ticket admitting him to all athletic games played on home grounds during the period when school is in session within the semester. It entitles him to hospital care, if needed, for not to exceed ten days per year during the period when school is in session. It admits him to the regular series of lectures and concerts, college plays, debates and oratorical contests.

*This plan of tuition payment by the hour enables the student to pursue twelve hours of academic work per week, instead of the usual fifteen, and thus complete his course in five years, paying practically the same amount of tuition as those who finish in four years. This is a great advantage to students financially dependent upon their own labor. Students pursuing this plan may pay for a thirteenth hour at this rate if the added hour is required physical education.

The payment of the fee for both semesters entitles the student to a copy of the annual, "The Wesleyana."

Matriculation fee: A matriculation fee of \$10.00 is required for each new student when applying for admission. This is in no case refunded but it is credited on the Student Activities fee for the first semester.

Late Registration fee: A registration fee of \$4.00 per semester will be charged each student who fails to complete registration before the close of the regularly appointed registration days.

Graduation fee: A fee of \$10.00 is charged all persons taking a degree in any College or School of the University. These fees are payable on the first day of May of the year of graduation.

Illness: In case a student is absent for more than half a semester, owing to illness, he will be charged at the rate of \$6.00 per week for instruction, and such laboratory and other fees as may be determined as just in each case; but no money will be refunded to students leaving of their own accord or through suspension or expulsion. Furthermore, a student who is absent from college on account of sickness or other causes and who retains his place in his class, must pay the full college bill covering his absence.

When Payable: All university bills are due at the opening of each semester and must be settled at that time. Students who fail to comply with the requirement will incur an additional charge, and, pending settlement, may be excluded from classes.

For Honorable Dismissal: No degrees are conferred upon students who have not paid their dues to the college, and no student can have an honorable dismissal, or certificate of progress in his studies, until his bills are settled. *Likewise, registration for another semester may not be made until charges for a preceding semester are fully paid.* No degree or diploma will be given a student who has not settled his bills in Bloomington.

ROOMS AND BOARD FOR MEN. In addition to the fraternity houses, there are many private homes, adjacent to the campus, where lodging and board may be secured. Board for young men may be obtained at from \$3.50 to \$6.50 per week. Furnished rooms with all modern conveniences cost from \$1.50 to \$2.50 per week per student. Comfortable rooms can be secured for as little as \$1.25 per week. Accommodations similar to those provided for women in the cooperative houses are available for men near the campus, in private homes approved by the University. In all cases boarding and rooming places for men are subject to the approval of the Dean of Men. A list of available places may be found in the Dean's office, where further information may be obtained.

RESIDENCES FOR WOMEN. Kemp Hall is an attractive residence for freshman women, operated by the Women's University Guild, which is represented in the Hall by the Head Resident. Kemp Hall is particularly well adapted to provide an atmosphere of culture and refinement for the girl living away from home. It would be difficult to find a more comfortable or more attractive residence on any campus than that maintained for all freshman women. All non-resident freshman women, except those who

make special arrangements in advance with the Dean of Women to work for room and board in private families or to live in a cooperative house, must room and board at Kemp Hall.

The rates for board and room are the same for each floor, and the charge for each student is two hundred fifty-two dollars (\$252.00) for the year, payable in four installments at the beginning and middle of each semester. It includes the cost of board and furnished room, electric light, and the laundering of bed linens. A student may not withdraw or leave the residence for any cause except when this cause is approved by the Dean of Women. When a student leaves school because of illness, her illness must be certified by one of the University physicians. After this certificate has been placed in the hands of the Dean of Women, the treasurer of the Guild will refund one-half of the charge for the rest of the semester.

Early applications are necessary in order to secure the most desirable rooms, as assignments are made when the rooms are reserved. In no case will a room be reserved unless a reservation fee of five dollars (\$5.00) is sent to Mrs. Clara D. Munce, 902 North Main Street, Bloomington, Illinois. The fee of five dollars is in addition to the regular cost of room and board for the year and provides for the expenses incurred during the opening days of Freshman Week.

Cooperative Houses. The University maintains two cooperative houses which enable students to secure board and room at actual cost. Each student helps in the work of the house, usually about an hour per day, under the supervision of the housemother. The cost is thereby minimized and probably will not much exceed five dollars per week for board and room. These houses are open to a limited number of freshman and upperclass women, assignments being made on the basis of experience, ability, financial need, and scholastic standing. Applications should be made to the Dean of Women and a two dollar (\$2.00) reservation fee is necessary for the reservation of a room in either of the houses.

Other Housing Arrangements. Upperclass women may also room and board at sorority houses, or at certain private homes on the approved list in the office of the Dean of Women. There are also a few homes where students may obtain work for room and board, and applications for these should be made to the Dean of Women as early as possible. All living arrangements must have the stated approval of the Dean of Women at the time of registration.

Scholarships and Aids for Students

Friends of Illinois Wesleyan University have provided a number of scholarships for worthy students in the College of Liberal Arts who need assistance. In a few cases, the right to name the beneficiary is reserved by the donor, but the larger number of scholarships are awarded by the University.

Scholarships are awarded *by the semester*. The retention of the scholarship during succeeding semesters will depend largely upon the needs, the scholastic achievement and the general attitude and character of the student.

Following is a list of the various classes of scholarships:

THE J. M. CATHCART MEMORIAL SCHOLARSHIP FUND of \$5,000 is the gift of Mrs. J. M. Cathcart and her sons, William G. and John A. Cathcart, as a memorial to the husband and father. The income from this is to apply on the tuition, board and room of a worthy student.

THE JACOB M. AND ELLEN HALL MEMORIAL SCHOLARSHIP FUND of \$5,000 is the gift of Mrs. Allice Hall Garlaugh, as a memorial to her parents. The income from this is to apply on the tuition, board and room of a worthy student.

THE NOYES SCHOLARSHIPS. The Trustees of the estate of LaVerne Noyes have assigned to Illinois Wesleyan University several scholarships covering the tuition of deserving students in the College of Liberal Arts. It is specified that these scholarships shall be awarded "without regard to differences of sex, race, religion or political party, but only for those who shall be citizens of the United States of America and either *First*, shall themselves have served in the army or navy of the United States of America in the war into which our country entered on the 6th day of April, 1917, and were honorably discharged from such service, or *Second*, shall be descended by blood from someone who served in the army or navy of the United States in said war, and who either is still in said service or whose said service in the army or navy was terminated by death or an honorable discharge."

HIGH SCHOOL SCHOLARSHIPS are awarded annually to a limited number of students officially declared as having the highest average rank for four years in an accredited high school or academy, provided such scholarship is taken advantage of within sixteen months from the time of graduation from high school. For the general conditions and regulations governing scholarships, see first page preceding. The conditions governing the continued use of these scholarships are the same as those governing the other scholarships but special stress is laid upon the scholastic record of the student. High school principals and students are cordially invited to make inquiry in regard to these scholarships.

UNIVERSITY SCHOLARSHIPS of varying amounts are awarded from the income of scholarship funds not specially designated. Awards are based upon evidence of good character, scholastic ability and financial need, after careful investigation by the Committee on Scholarships and Financial Aid.

RHODES SCHOLARSHIP. The man who wins this scholarship resides for three years at Oxford, England, and during this period of study, receives £400 a year. A candidate to be eligible must be a male citizen of the United States, with at least five years' domicile, and unmarried. A candidate to enter Oxford in 1938 must have been born on or after October 1, 1913, and before October 1, 1919, and must have completed at least his sophomore year at some recognized degree-granting university or college of the United States of America.

Institutions select the candidates they propose on the basis of the qualities which will be considered by the Rhodes Scholarship Committee in making the final selection. These are:

- (1) Literary and scholastic ability and attainments.
- (2) Qualities of manhood, force of character, and leadership.
- (3) Physical vigor, as shown by interest in outdoor sports or otherwise.

Further information regarding the method of selection, and any other questions connected with the awarding of the scholarship, may be secured from Professor Samuel C. Ratcliffe, of Illinois Wesleyan University.

THE UNIVERSITY OF ILLINOIS SCHOLARSHIP. Each year Illinois Wesleyan University has the privilege of choosing a member of the graduating class or an alumnus to receive a scholarship for graduate work in the University of Illinois. The one chosen must be of high

scholastic rank and have the preparation and ability to specialize in some given field. Other alumni of Illinois Wesleyan University occasionally receive scholarships on recommendation from the heads of departments in which their major work has been done. This scholarship yields three hundred dollars.

ALUMNI ASSOCIATION PRIZE. A gold watch is given to that student whose record for four years of college work is highest with respect to the same qualities which serve as the basis for the awarding of the Rhodes Scholarship. Three years of this work, including the senior year, shall have been taken in the College of Liberal Arts of Illinois Wesleyan University. The prize is provided by the University Alumni Association and is awarded on Commencement Day.

LOANS. A limited amount of aid can be obtained as a loan from the Board of Education of the Methodist Episcopal church by needy and worthy students who are members of that church, and who have been members at least one year. Detailed information may be secured from Professor Ralph E. Browns, Loan Officer.

For the benefit of Bloomington and McLean County women students of junior and senior standing, the Bloomington Woman's Club maintains a revolving loan fund, to which a sum is added each year.

The Bloomington Branch of the American Association of University Women grants loans to deserving and needy junior and senior women.

The Bloomington Panhellenic Association maintains a loan fund to aid junior and senior students, preferably women. Information concerning these special loan funds for women may be obtained from the Registrar.

STUDENT SELF-HELP. There are in Bloomington a large number of opportunities for self-help, which are open to energetic students. During the past years hundreds of students have been placed through the efforts of the employment bureau, and a few have been able to earn all their expenses. As a rule, however, this can be done only at the risk of health, or scholarship, or both. Prospective students should accumulate at least enough to pay a semester's expenses before entry; otherwise they should plan to take only part of the regular schedule. The President of the University is always glad to correspond with any person who desires remunerative employment while in school. An employment bureau for students operates under the supervision of the faculty.

Description of Courses

The following pages list the courses offered in the College of Liberal Arts. The figure in parenthesis following the description of a course indicates the number of "semester hours" of credit. The term "minimum sequence" defines the requirements which must be met in a particular department, should it be chosen as one of the two required within the student's field of concentration.

Courses numbered A1, A2, etc., are open to freshmen and sophomores only. Courses numbered B1, B2, etc., are designed primarily for underclassmen but are open to upperclassmen. Certain specified "B" courses are not open to freshmen. "C" and "D" courses are designed for upperclassmen. "C" courses are in some instances open to sophomores who have completed a "B" course in the same department. "C" courses are given in regular class instruction. The "D" classification indicates seminars and conference courses, open to advanced students after consultation with the instructor.

SURVEY COURSES

The following survey courses are designed to introduce the student to the several fields of study. They are not intended to serve as completed summaries of all modern knowledge. The basic problems and standpoints of the various departments and divisions will be presented in such a way as to show the relationships of the subjects to each other and to the intellectual outlook of the modern man. The student who completes this series of survey courses should receive a more related and unified view of the world in which he lives than has been possible under the older plan of required sampling of one or more specialized courses within groups of studies.

Courses A1 and A2 constitute a one-year survey of the natural sciences. Courses A3 and A4 constitute a one-year survey of the social sciences. These courses are definitely divided into semester units and either semester's work may be taken first. Course B1, B2 is a single unit survey of the humanities and must be taken as a year course.

These courses are required of all candidates for a degree in the College of Liberal Arts, with certain exceptions stated on a preceding page. See "Underclass Studies."

A1. PHYSICAL SCIENCE SURVEY. This is not a short course in each of the several sciences, but is designed to give a broad and appreciative knowledge of the nature of the physical universe, to show how each of the sciences has contributed to our knowledge of the physical universe and hence to the welfare of mankind.

Along with the study of matter in its massive astronomical and geological forms a study will be made of the nature of matter itself,—of elements and compounds, of atoms and molecules, of electrons, and protons, of atomic structures and atomic energies and of certain types of chemical changes that these forms of matter undergo. The chemistry of the simpler compounds of carbon will be considered briefly. The course will also include a study of the nature, sources, uses, and measurement and transformations of the various forms of energy. The conservation and degradation of energy will be considered from the standpoint of the well known thermodynamic laws and the kinetic molecular hypothesis. A study of sound and light as wave phenomena will also be made and the principles thus learned will be used to introduce the student to the simpler aspects of the wave mechanics. Three lectures and one discussion period per week. (4) Repeated each semester.

A2. BIOLOGICAL SCIENCE SURVEY. A course designed to introduce the student to the science of life and its relation to other fields of knowledge. Both plant and animal forms are considered. Emphasis is placed on the broader principles such as the nature of protoplasm, the cell, single-celled organisms, the green plant, structure and development of the animal types, heredity and the theory of evolution. Certain lectures are devoted to hygiene. Three lectures and one demonstration period per week. (4) Repeated each semester.

A3. SURVEY OF THE SOCIAL SCIENCES, I. This survey has a dual purpose. It is intended to make students familiar with the major social and economic problems of the world in which they live and it is intended to help them see those problems in the perspective of our social development. The content of this course is so different from that of all others offered in the sociology and economics departments that students intending to specialize in either of these sciences should take it, and, if possible, should do so during their freshman year. (3) Repeated each semester.

A4. SURVEY OF THE SOCIAL SCIENCES, II. An introduction to the problems of world politics, enabling the student to broaden his horizons and form new viewpoints that are vitally needed by citizens of the new world society. The course embraces a study of politics and political science, nationalism, imperialism, public opinion, war and peace, international law, the League of Nations, the World Court, Fascism, Communism, Hitlerism, and other political theories. (3) Repeated each semester.

A5, A6. COLLEGE PROBLEMS. A course designed to acquaint the woman entering college with the opportunities presented by a college career and with the means and methods best suited to attain self-direction in study and in the development of a balanced personality. Required of all freshmen women. (1) Two semesters.

B1, B2. *SURVEY OF THE HUMANITIES*. This course is offered jointly by the Departments of Art, Classical Languages, English, Music, Philosophy, and Religion. From their beginnings, in the civilizations of the Ancient East, passing through the Greek and Roman civilizations and the medieval West, the developing outlooks and attitudes of the modern period are traced, with attention given to all the various avenues through which the great minds of each period have sought to interpret the dominant cultural ideas of their own time. Through such an approach the student is enabled to view the dramatic story of man's constant quest for beauty, truth and goodness synthetically and organically, not fragmentarily and disjointedly, as is so frequently the case under traditional methods. Four lectures and one discussion period per week. Must be taken as a year course. (5) Two semesters.

CHEMISTRY

PROFESSOR MORTIMER

The training of the young chemist must include, not only a mastery of the fundamental principles of chemistry, but also a considerable knowledge of the subject matter of certain related fields. The choice of related subjects depends upon the aims and interests of the individual student. Mathematics and physics are among the best supporting courses for those whose interest is along physico-chemical lines, while physiology and bacteriology are essential to those whose interest is in bio-chemistry. Ability to read scientific German (and French, if possible) is essential for all who expect to pursue graduate work or do research in chemistry.

In order to obtain the recommendation of this department for any responsible position or graduate fellowship, the student must demonstrate, not only in his separate courses but also in a Senior Examination covering the field of the major, that he has acquired certain skills and has mastered the fundamental principles of the science, and that he is able to apply his knowledge to the solution of practical problems. He must also have acquired a reading knowledge of scientific German or French.

EDUCATION

PROFESSOR THOMAS AND COOPERATING PROFESSORS

The courses in Education are designed to provide professional preparation for those who expect to enter educational work, either as administrators or as teachers in high schools. It is not recommended that students select Education as their field of major interest, but in some cases such selection may be permitted. In any case, students who expect to teach should select other fields of major or minor interest so that they may be able to teach more than one high-school subject. If a student chooses to make this his field of major interest, twenty semester hours including courses B1, B3, B4, C5, C6, and C8 are required. All students who expect to teach in Illinois must take fifteen semester hours of Education, six hours of which must be in courses B3 and C6. Courses B1, B3 and B4 should all be completed before any C or D courses are begun.

Special methods courses are offered in the several divisions of the curriculum. Education credit is allowed for two special methods courses. These courses, however, must not be in the same department. All special methods courses are listed below and described under the departments in which they are taught.

Minimum Sequence: 15 semester hours, including courses B3, B4, and C6.

PHYSICAL EDUCATION

DIRECTOR BELL, ASSISTANT PROFESSOR PARKER,
ASSISTANT PROFESSOR NIEHAUS

All students are required to take four semesters of physical education, two periods per week during their freshman and sophomore years, unless excused by the University physician. Medical examinations are given to all freshmen by a corps of competent physicians and physical examinations are given within the department. On the basis of these examinations, the work in this department is then determined, care being given to make the nature of the work fit the needs of the individual student. To meet a common need, lectures on hygiene are given in connection with the classwork of all groups.

The aims of the department are: (1) To teach ways of attaining and maintaining good health; (2) To correct bodily defects so far as it is possible; (3) To create a democratic spirit of friendship and cooperation through team play and other forms of exercise; (4) To give

wholesome recreation and a knowledge of various games through a varied and extensive intramural program for all students; and (5) To create a love for exercise and healthful living which will carry over into later life.

Elementary swimming must be elected by all who cannot swim. A swimming test is given after the fourth semester of physical education; passing such a test is required before graduation.

PHYSICAL EDUCATION FOR MEN

Men on the intercollegiate squads are given required physical education credit while these sports are in progress, after which they are transferred to the regular classes. Arrangements for the exchange of this work must be made with the instructor in physical education, otherwise no credit will be given.

The regulation uniform consists of a white sleeveless shirt, blue running pants, rubber soled gymnasium shoes, and a grey sweat shirt. All students taking physical education are charged a locker fee of one dollar per semester which provides for a locker and clean towels.

A1, A2. PHYSICAL EDUCATION, I. Elementary instruction in all major and minor sports in season, elementary apparatus, general gymnastics, health lectures, and corrective work. Required of all freshmen. (1) Two semesters.

A1s, A2s. ELEMENTARY SWIMMING. This course is for beginners, and takes up elementary work in swimming and diving. Required of all freshmen who cannot swim. (1) Two semesters.

B1, B2. PHYSICAL EDUCATION, II. Continuation of A1, A2 along more advanced lines. Prerequisite: A1, A2. (1) Two semesters.

These courses extend over three years in addition to the required physical education and include observation and practice on the field and on the floor in connection with a series of lectures and studies covering the various phases of the subject.

In view of the combinations most frequently demanded, it is suggested that a student pursuing this program complete a strong sequence

mathematics, one of the sciences, or history. To meet the requirements of the State of Illinois and of the North Central Association, one must have fifteen semester hours in Education.

Minimum Sequence: 15 semester hours.

B1x. *PHYSIOLOGY*. The structure and functions of the organs of the human body. Offered in the Department of Biology. Prerequisite: Sophomore standing. Three lectures or recitations per week. (3) First semester.

ATHLETIC COACHING AND PHYSICAL EDUCATION METHODS FOR WOMEN

Students intending to pursue this sequence should include the following in their freshman and sophomore work: folk dancing, interpretative dancing, swimming, soccer and track. Knowledge of baseball, hockey, tennis and volleyball may be acquired as class work, or through participation in the Women's Athletic Association program.

In general, the courses of this sequence are open to students who have completed their fourth semester of required physical education or are registered therein. After the student has acquired an understanding of the theory, she is required to do supervised practice teaching in the community centers of Bloomington, on the city playgrounds, and in the program of intramural competition within the Department.

The following courses are suggested as valuable electives for students who expect to teach physical education or direct playground work: Education B3, Psychology C7, Speech B1. To meet the requirements of the State of Illinois and of the North Central Association, one must have fifteen semester hours in Education.

Students preparing for graduate work in public recreation should choose sociology as a subject of major interest and should pursue courses in dramatics, art, and music.

Minimum Sequence: 17 semester hours.

SOCIOLOGY

PROFESSOR RATCLIFFE

The courses presented in this department deal with the relationships between persons and groups and with the problems which arise therefrom. Each course contributes toward a more adequate understanding of some phase of social life and thus promotes a more intelligent citizenship. Students who plan to enter any phase of social welfare work, as a vocation, should make the Division of the Social Sciences their field of concentration and sociology their major interest. Students who begin as late as the junior year will still find it possible to complete the sequence.

Students who elect sociology as a major interest must present at least two hours of credit from D-courses. They must also possess a reading knowledge of either German or French. To candidates for the de-

gree of Bachelor of Science, permission may be granted by the head of the department to substitute six hours of non-required English literature for this latter requirement.

Minimum Sequence: 15 semester hours.

Special Curricula

Professional schools to-day, more than ever before, are requiring or recommending the completion of a liberal arts course before the student enters upon his specialized course of study. The following suggestions should be of help in the choice of electives by students who expect to complete four years in liberal arts. Those who cannot do so will find that these courses will prepare them for entrance to such professional schools as admit students with less preparation. The catalog of the particular school one desires to enter should, however, be consulted for minor variations in requirements.

All students pursuing these courses will take English Composition throughout the first year and Physical Education throughout the first two years.

BUSINESS ADMINISTRATION. For those students who desire to specialize in the field of general business administration, the following suggested course will provide a well-rounded training in the principles underlying general business, glimpses into some specialized fields of activity, together with a background for practical living and an appreciation of the higher ideals of life.

First year: Economics A3, B1, B2; Surveys A1, A2, A3, A4; Math. B1.

Second year: Economics B6, C1, C2, C4; Survey B1, B2; Religion A1; Psychology B2.

Third year: Economics B5, C1, C2, C5, C8; Political Science B1, B2; English B1, B2; Speech B1.

Fourth year: Economics B11, C6, C10, D2; History C1, C2; Sociology B3.

CHEMISTRY. Students expecting to specialize in chemistry will find that the following suggested curriculum, together with the proper selection of electives, will equip them (1) to meet the requirements for entering the graduate schools of the large universities, (2) for teaching positions in high schools and assistantships in university laboratories, and (3) for entering industrial laboratories as research and operating chemists.

First year: Chem. B1, B2, B4; Math. B1, B2, B8; Religion A1; Survey A2.

Second year: Chem. C1, C2; Math. C1, C2; Surveys A3, A4, B1, B2.

Third year: Chem. C5, C6; German B1, B2; Biol. B1, C4; Physics B1, B2.

Fourth year: Chem. D1, D2; German C1, C2.

ENGINEERING. A student who expects to complete a course in mechanical, electrical or civil engineering may take the first two years of his course in this institution, thereby preparing himself to complete the course in two more years in a university school of engineering, provided

he has had sufficient entrance requirements. In all cases, he should consult with the head of the Department of Physics and plan his electives in the second year with reference to the particular kind of engineering course he expects to complete. The attention of students who expect to spend their junior year with us is further directed to the advanced mathematics and science courses.

First year: Chem. B1, B2, B4 or Physics B1, B2; Math. B1, B2, B3, B4, B8.

Second year: Physics B1, B2 or Chem. B1, B2, B4; Physics C4; Math. C1, C2; German B3, B4 or French B3, B4.

JOURNALISM. The following courses with added electives are suggested as a background for specialized courses in schools of journalism, enabling the student to complete the course in four years:

First year: French B1, B2 or German B1, B2; Survey A1, A2; Survey A3, A4 or History, B1, B2.

Second year: English Comp. B3, B4; Survey B1, B2; German C1, C2 or French B5, B6 or Pol. Sci. B1 or B2; Hist. C1, C2 or Econ. A1, B4 or Soc. B2, B3.

LAW. A minimum of three years of liberal arts are required for entrance to law schools in Illinois. Students expecting to take up the study of law should pursue the regular survey courses and secure a reading knowledge of a foreign language. They should emphasize in the choice of electives such subjects as English and American history, political science, economics and sociology, and should take some courses in psychology and speech.

MEDICINE. To those students who wish to prepare for the study of medicine Illinois Wesleyan offers a schedule of carefully selected courses. It is the aim to prepare the student for entrance to the best medical schools, and generally speaking such schools require three or four years of college training as an entrance requirement. Supplemented by electives, the following curriculum is suggested as a proper training for this field of professional study. This curriculum is suggestive only. It is not necessary that all of these courses be pursued.

First year: Chem. B1, B2, B4; Biol. B2; Religion A1; Math. B2; Survey A3.
Second year: Chem. C1, C6; Biology B1, C8; Psychology B2; Surveys A4, B1, B2.
Third year: Biol. C5, C6; Physics B1, B2; German B1, B2; Chem. D1; Sociology C6.

Fourth year: Biol. C4, D3; German C1, C2; Chem. C2, C4.

By special arrangement, the exceptional student may complete part of the senior year's work by pursuing certain courses in a medical school of good standing.

MINISTRY. The completion of a four year college course is prerequisite to entrance as a regular student in standard theological schools. It is suggested that the student choose as his subject of major interest one of

the following: philosophy, sociology, English, history. All these subjects should be emphasized in the choice of electives. Courses should also be elected in economics, psychology, religion, and speech. Greek is suggested as the most useful language.

PUBLIC ADMINISTRATION. The need of men of broad and liberal training in various branches of administrative work under public auspices has long been apparent. The trend of events in recent years serves only to emphasize it. Men who can envisage their tasks in the light of great social ideals and bring to them also the needed techniques and skills must be men of wide culture, versed in the historical backgrounds and social ramifications of the problems with which they deal. Illinois Wesleyan undertakes to lay for interested students that broad foundation of social knowledge, upon which later technical training can be most profitably built.

Supplemented by electives, the following general plan of studies is suggested:

First year: Surveys A1, A2, A3, A4; History B1, B2; Religion A1.

Second year: Survey B1, B2; Economics C1, C2; History C1, C2; French B3, B4 or German B3, B4 or Spanish B3, B4.

Third and fourth years: History C9, C10; Political Science B1, B2; Economics C3, C5, C8; Sociology B3, C5; Philosophy C1, D1.

This curriculum is suggestive only. The proper choice of electives depends upon the type of public administration work contemplated. Other available courses are as follows: History C5, C6, C7, C8; Economics C4, C13, C14, D2; Sociology B2, C4, C8, D6; and additional foreign language courses.

SECRETARIAL PRACTICE CERTIFICATE. To meet the demand for college-trained men and women in the secretarial field a curriculum is offered, leading to the degree of bachelor of science with certificate in secretarial practice. Students entering this interesting and profitable vocation must be prepared to follow intelligently the transactions of their employers, as they may even be called upon to act for their employers in situations which demand both tact and prudence. The training of the private secretary should therefore introduce the student to the fundamentals of modern business and should be broadly cultural as well as technical. The course requires the completion of 130 semester hours for students who have not taken shorthand and typing in high school; also the completion of a field of concentration and all other stated requirements for graduation.

First year: Econ. B1, B2; Surveys A1, A2, A3, A4; Religion A1.

Second year: Econ. B4; Survey B1, B2; Speech B1; Shorthand and Typing.

Third year: English B1, B2; Psych. B2; Hist. C1, C2 or Pol. Sci. B1, B2; Soc. B3; Shorthand, Typing and Office Practice.

Fourth year: Econ. C8, C13, C14.

TEACHING. Illinois Wesleyan University does not undertake the training of teachers for grade school work, but maintains strong courses in Education for the professional training of high school teachers and administrators. To meet the requirements of the Illinois State Examining Board and of the North Central Association one must have 15 semester hours in Education, including Educational Psychology (3 hours) and Principles and Methods of Teaching (3 hours), in addition to meeting certain general requirements in other departments.

Education B1 should be elected in the sophomore year. All students preparing to teach should consult the head of the Department of Education early in their college course concerning the preparation needed in the particular subjects they expect to teach.

School of Music

GENERAL STATEMENT

The School of Music proposes to teach those who wish to make a serious study of music and to teach this art in the fullest and highest sense, so that its students may become men and women of highest ideals and usefulness as artists and teachers of attainment.

There is also that ever increasing class who recognize that a knowledge of music and musical literature is a vital part of a liberal education. Being conscious of this fact, it is the aim of the School of Music to develop those values in the life of every student in the University.

The organization of the School of Music as an integral part of a recognized smaller university makes it an ideal situation for the study of music, where all may share in and all contribute to the cultural life of the institution. For a description of the concert opportunities and other cultural advantages, see pages 14-16.

The School of Music is located in Presser Hall, erected in 1929, and made possible by a large initial gift from the Presser Foundation. In this building are well-equipped studios, classrooms, practice rooms, and a large auditorium with modern stage equipment. The total equipment includes seven pipe organs and sixty pianos.

The School of Music is accredited by the National Association of Schools of Music.

ADMISSION REQUIREMENTS

For admission to a course leading to a degree, the academic requirements are the same as for the admission to the College of Liberal Arts: viz., graduation from an accredited high school or the completion of fifteen acceptable units of high school work, three of which may be music.

Information concerning musical requirements for admission will be found on pages 7, 8, 9 of the regular School of Music bulletin. This bulletin will be mailed upon request. All or any part of the preparatory courses may be taken in the School of Music, and in many cases, with diligent study and concentrated efforts, talented pupils may in the four

years' study required for a degree or diploma in music, complete both the preparatory and collegiate musical requirements for graduation.

The School of Music year of thirty-six weeks is divided into four quarters of nine weeks each. Students may enter at any time and pay tuition at the quarter rate from the date of their entrance but all students interested in definite courses are urged to enter at the opening of the first or third quarter in order to receive the benefit of class assignments, etc. Special students are accepted at any time.

CURRICULA

Degree Courses. A standard four year course is offered in voice, piano, organ, violin, and composition, leading to the degree of Bachelor of Music.

The ever increasing demand for better trained public school music teachers and supervisors has led this school along with all schools of music of high standards to extend its public school music course and its band and orchestra leaders course to four years, offering also upon completion of this course the degree of Bachelor of Music. (Upon completion of the first two years of this course the Illinois State Examining Board will issue a special certificate, if the student so desires, allowing the holder to teach music in the public schools of the state.)

All candidates for a degree must spend at least one year, the senior year, in residence at the University.

Diploma Courses. A four years course in voice, piano, organ, violin, and composition leads to a diploma in these subjects. This course is designed to accommodate students who are unable to meet the scholastic requirements for the degree course.

For entrance to this course ten units of high school work are required and also the same musical requirements as for the degree course.

This course is exactly the same as the degree course, omitting the subjects in the College of Liberal Arts.

Art. With the coming of a national school of art in our country, a general and fast growing interest in the fine arts as well as an understanding of the general educational value of the arts, the demand has been created for artists of constructive ability in the artistic world and in business, and for teachers in our secondary schools trained in the fundamental principles of art and its relations to everyday living. The courses of class instruction are described elsewhere in this catalogue.

Art students are required to furnish their own materials, except easels. Students' work when finished is under the control of the department until after the annual exhibition. The department reserves the right to retain two studies permanently from each student, to be kept in the department for reference.

Liberal Arts Credit. Credit for a limited number of hours in theoretical music and in approved correlated courses in applied music, will be allowed toward a liberal arts degree. The music courses which may be taken for credit in the College of Liberal Arts are listed in this catalogue among the courses offered in that College.

TUITION

The School of Music of thirty-six weeks is divided into four quarters of nine weeks each. Tuition for students registered in any of the three regular curricula offered by the School of Music is ninety dollars (\$90.00) per quarter for fourteen to seventeen hours per week, inclusive, regardless of the choice of applied subjects and regardless of the teachers under whom they study. This quarterly charge includes tuition for all classes, for all private lessons, practice room fees, and the matriculation fee. It also covers the student activities fee. See page 38.

Any students electing to take less than fourteen hours in one of the School of Music curricula is charged according to the schedule of fees listed below and also pays \$6.50 per quarter as a student activities fee. Any student choosing to take more than seventeen hours is charged for the additional hours, outside the regular course, according to this schedule of fees.

Regular degree students in the School of Music receive free instruction in those subjects in the College of Liberal Arts which are required in the School of Music curricula, a total of thirty-four semester hours, designated in the special bulletin of the School of Music.

Tuition charges in the Departments of Art and Dramatic Art are listed below. Certain courses in Art, as well as in Music, are marked by an asterisk (*), designating them as exempt from tuition fees for students regularly enrolled in the College of Liberal Arts.

GENERAL STATEMENT

To meet the need for scientifically trained women to fill administrative and teaching positions in schools of nursing and to go into the broader

fields of public health nursing, a five year combined collegiate and professional course leading to the degree of Bachelor of Science and the Graduate Nurse's diploma has been organized under the joint auspices of Illinois Wesleyan University and Brokaw Hospital. School of Nursing Entrance Requirements are the same as for students of the College of Liberal Arts.

During the first two and one-half years the student's work is entirely in the University and the student pays the regular tuition and fees to the University. The remaining two and one-half years are spent in residence at the hospital. Full maintenance is provided by the hospital during this period and time will be accredited at the end of the course.

Further information will be furnished on request.

Activities and Organizations

Illinois Wesleyan has always conceived of extra-curricular activities as necessary to the adequate expression of undergraduate life and as supplementary to the work of classroom and laboratory. Because of this belief in the close relationship of the curricular and extra-curricular, no new organization may be formed without faculty approval of its purposes and constitution.

CHAPEL is held on Wednesday and on Friday of each week in Presser Hall, at which attendance is required. The Wednesday service is usually devotional in character; Friday is usually given over to the promotion of athletics, to music and drama, and to informative and entertaining lectures. Faculty members, students, guest speakers and guest artists, all make their contributions to these services.

PHI KAPPA PHI, founded at the University of Maine in 1897, was established at Illinois Wesleyan to maintain for learning its rightful place of primacy on the campus. Student members are elected from those individuals who are within one year of graduation and who have achieved an honor record in a four-year college course, one-half of which has been completed at Illinois Wesleyan. Selection is made from the upper fifth of the graduating class, the standing being determined by the Registrar's record. No discrimination is made in elections on account of sex or course of study. Phi Kappa Phi has a coveted place on Wesleyan's campus.

The STUDENT UNION is composed of a representative of each of the social fraternities and sororities on the campus, together with a number of representatives of the unorganized students proportionate to their numbers. Its purpose is to promote a wholesome spirit of camaraderie among all members of the University community and to provide a responsible organization through which the student body may work upon common problems collectively.

PI KAPPA DELTA is the honorary society whose membership is bestowed on those students who have distinguished themselves in the fields of oratory and debate. Representatives are sent to the annual Illinois Intercollegiate Oratorical and the Intercollegiate Peace Oratorical Association Contests. Delegations are sent to both regional and national

Pi Kappa Delta contests and Illinois Wesleyan has always maintained an enviable position in the Illinois Intercollegiate Debate League.

MASQUERS and THETA ALPHA PHI (national honorary dramatic fraternity), are organizations devoted to the drama. The former is composed of students who have taken part in one of the organizations monthly programs of one-act plays. These are in addition to the three or four full-length plays sponsored annually by the University. Theta Alpha Phi membership is conferred as an honor upon those individuals whose work in a number of dramatic performances is of high calibre.

PHI SIGMA IOTA, Eta Chapter, gives due recognition to advanced students who have distinguished themselves in Romance languages. The FRENCH CLUB gives its members opportunities to make personal contacts and attain proficiency in conversation.

PI GAMMA MU, social science honor society, recognizes outstanding scholarship and stimulates activity in the fields of the social sciences. Membership is determined upon the basis of scholarship and attainment in social studies by nomination of the faculty members of the organization. Selections are made from the upper scholastic level of both junior and senior classes. Monthly meetings of active members serve to cultivate a scientific and sympathetic attitude toward the solution of dominant social problems. The INTERNATIONAL RELATIONS CLUB is another active social science organization.

EPISCOPOI includes in its membership men interested in full time Christian work as a life calling.

The Y. W. C. A. is composed of a group of women undergraduates who are interested in the intellectual and spiritual enrichment of life.

The WOMEN'S ATHLETIC ASSOCIATION is an organization open to all women students who fulfill certain health and athletic requirements.

The BACONIAN CLUB is composed of students with particular interests in the physical and biological sciences, while the PRE-MEDICAL CLUB meets the needs of students expecting to enter that specialized field of study.

The HOME ECONOMICS CLUB is composed of students whose interest is in the field of Home Economics.

The Illinois Wesleyan ARGUS is the newspaper published weekly during the academic year by a board of student editors appointed on merit after due competition. Students in Journalism are given practical experience and student opinion an adequate vehicle of expression.

The WESLEYANA, the college annual, is published by the junior class in May of each year. The fees for the Wesleyana are included in the student activities fee and every undergraduate receives a copy of the annual at the end of the second semester.

Election to GAMMA UPSILON honors those reaching certain standards of service on The Argus or The Wesleyana.

The A CAPELLA CHOIR holds a unique place on the campus and in the many cities where it appears on tour. Membership is limited to exceptional voices.

The ST. CECILIA CLUB, girls' glee club, and the APOLLO CLUB, men's singing organization, afford opportunity for undergraduates to express themselves musically. The University CHORUS is open to any undergraduate desiring opportunity to sing.

The Illinois Wesleyan MARCHING and CONCERT BANDS are well-known musical organizations affording instrumental opportunities. The University ORCHESTRA is another means of musical expression as is also the SYMPHONIC ENSEMBLE. See pages 14-16.

The ATHLETIC PROGRAM at Illinois Wesleyan is given due attention. Intercollegiate teams for football, basketball, baseball, track, tennis and golf are regularly organized and Illinois Wesleyan students have won their share of honors in athletic contests with other colleges. As it is not desirable to place extreme emphasis on the production of expert teams, attention is given to the cultivation among all students of a love of outdoor life and all kinds of sports. See the description of courses in the Department of Physical Education.

All students in intercollegiate sports are required to be passing in twelve hours of academic work. Instructors report at stated intervals to the Committee on Athletics as to the standing of members of squads, and failure to carry the required hours of class work results in the athlete losing his place on the squad.

The athletic activities of the University are under the sole control of a Committee on Athletics comprised of faculty members only. The University acting with and through the Committee on Athletics requires the enforcement of the rules, and nothing of professionalism, rowdiness, or sportsman-like conduct is tolerated.

The University is a charter member of the Illinois Inter-collegiate Athletic Conference (the "Little Nineteen") and its athletic rules and regulations are determined by the requirements of this conference.

The Staymates Lecture Foundation. By the will of the late Hon. Byron F. Staymates, of the Class of 1876, Illinois Wesleyan University received a gift with which to establish a lecture foundation on which a course of lectures on scientific and literary subjects is periodically given by some distinguished scholar.

Bequests and Gifts

General Form of Bequest. The University is dependent upon the continued good will and support of its many friends. To make Illinois Wesleyan with its ever lengthening column of youth a beneficiary in your will, the following form of bequest is suggested:

I give and bequeath the sum of _____ dollars (or designated property or portion of estate) to the Trustees of the Illinois Wesleyan University, of Bloomington, Illinois, the principal and income or either of them to be used as its Board of Trustees shall determine.

Annuities and Special Gifts. The University welcomes the annuity form of gift and investment, which affords to the annuitant a regular income carefully protected. Concerning this and other special forms of gifts, the President of the University will gladly send information to those interested and arrange for consultations.

Buildings and Equipment

The campus of Illinois Wesleyan University occupies about six city blocks in the heart of Bloomington's north side residential district. The well planned and beautifully shaded grounds are entered from Main Street on the west through the Founders' Memorial Gate, erected by the Bloomington Association of Commerce, and from Park Avenue on the east, through a recently erected gate given by a trustee, Mr. E. M. Evans.

Located in the center of the campus is HEDDING HALL. This large four-story, brick building, built in 1870, houses the administration offices and many classrooms. In it is Amie Chapel, recently renovated, a college landmark since the building was completed. In the east wing of the ground floor are the work rooms and laboratories of the Department of Economics and Business Administration. In the west wing on the same floor are located the well-equipped kitchen, the dining room, and the laboratories of the Department of Home Economics.

Directly north of Hedding Hall is the University's oldest structure, OLD NORTH HALL. It has recently been remodeled and houses not only many classrooms but Radio Station WJBC as well. This broadcasting station is owned and operated by a private corporation.

SCIENCE HALL, erected in 1910, is a modern two-story, fire-proof building housing the classrooms and laboratories of the Physical Sciences. The Physics Department occupies the ground floor of this building with its air and vacuum-piped laboratories, its complete electrical, spectroscopic and miscellaneous equipment as well as an ample machine shop. The Chemistry Department with its two lecture rooms, four laboratories, library and office is on the first floor. The inorganic, quantitative, organic and physical chemistry laboratories are equipped with the best and latest chemical apparatus for both general and special use. The library contains seven hundred volumes with new, valuable additions being made each year. The Biology and Geology Departments are located on the second floor with adequately equipped laboratories and the best of facilities for both introductory and advanced courses.

MEMORIAL GYMNASIUM is on the northeastern slope of the hill on which the campus is located. This adapted colonial structure, erected in 1921, contains a large gymnasium floor, seventy-two by one

hundred feet in dimensions, offices, locker rooms, showers, and a large swimming pool with violet ray filter apparatus.

One block north of the gymnasium is WILDER FIELD, Illinois Wesleyan's athletic field. This field includes four soft-ball diamonds, a full-sized baseball diamond, and a quarter-mile track as well as bleachers and football playing field. The tennis courts are located at the northwest corner of the main campus.

On the southwestern extremity of the campus BUCK MEMORIAL LIBRARY was built in 1922. Surrounding the main reading and study room are several seminar rooms, the Buck Memorial browsing room, the stacks, and the offices of the library staff. Within this beautiful Gothic structure is located the Powell Museum, named in honor of Major John Wesley Powell, the first white explorer of the Grand Canyon and at one time a Wesleyan professor. Included in the Museum are the following collections:

The Powell collection of Indian pottery.

The Lichtenthaler collection of shells and sea algae.

The Illinois Geological Survey collection of characteristic fossils of Illinois.

The Harrison collection of geological and archaeological material.

The Weems archaeological collection of stone craftsmanship.

The Holder collection of birds and animals.

The Smith collection of Civil War relics and seeds of economic importance.

The Vasey collection of useful and ornamental woods.

The Elrod collection of selected specimens.

The Library also contains the Aldrich collection of paintings and the Aldrich collection of books on painting, sculpture and allied subjects.

The stack rooms of the library hold over thirty-seven thousand volumes. The library purchase and maintenance program receives the benefit of the income from the foundation of \$100,000, given by Mrs. Martha Ann Buck, the donor of the library building. There are in addition the following endowed funds for the purchase of books:

The Colin Dew James Foundation of one thousand dollars, for books on Church History.

The Amanda K. Casad Foundation of five hundred dollars.

The John Anthony Jones Foundation of one hundred dollars, for books on the social sciences.

Two of the most recent gifts received have been Mr. Josiah K. Lilly's collection of Stephen A. Foster's songs and several valuable incunabula.

The latest addition to Wesleyan's campus is PRESSER HALL, built in 1929. Made possible by a conditional pledge from the Presser Foundation of Philadelphia this \$200,000 sound-proof building contains a large auditorium equipped with a Hinners four-manual pipe organ, twenty-four studios, fifty practice rooms containing upright pianos, six pipe organ practice rooms and several recital halls.

The WESLEYAN CHIMES, installed in 1935, ring out their rich tones over a wide area through a powerful amplifying system. The installation was a gift from the classes of 1925 to 1932, inclusive.

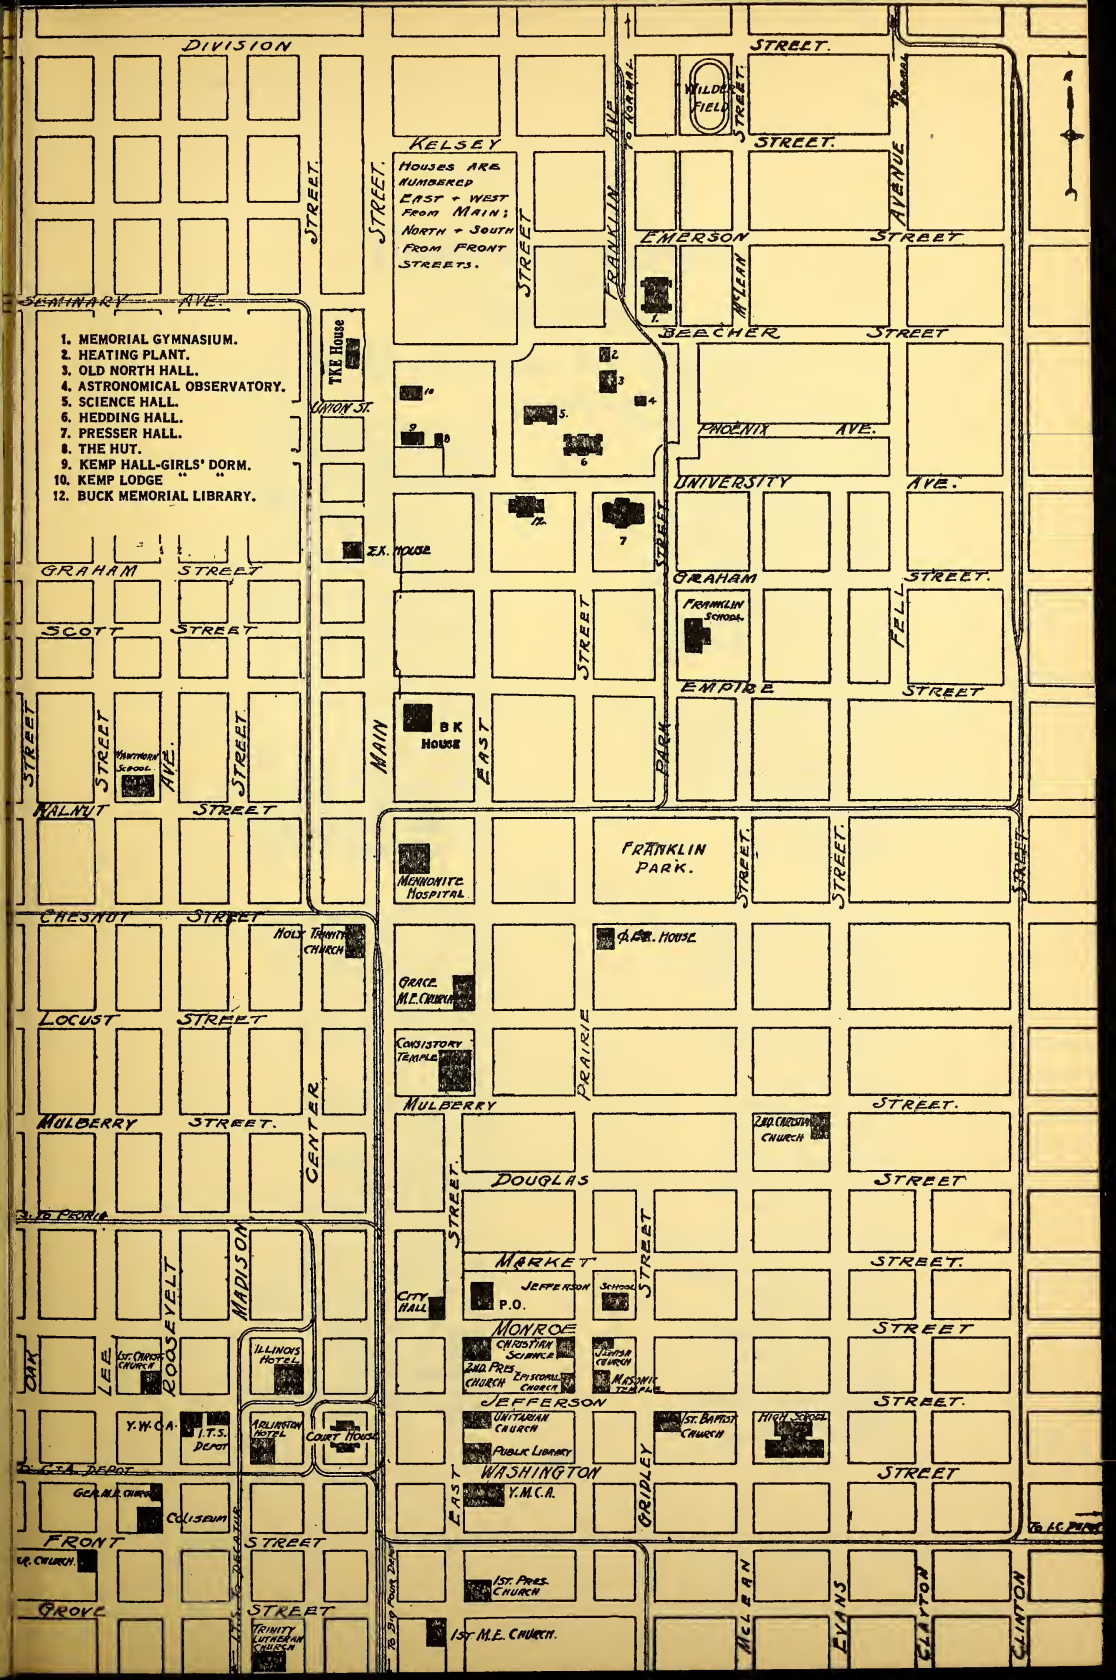

KEMP HALL, the freshman women's dormitory, is located on the west side of the campus. It is a commodious three-story building of brick with a home-like interior which compares favorably with the best college residence halls. In addition to Kemp Hall the University has two comfortable residences, which it manages on a co-operative basis for both first-year and upperclass women.

THE HUT is a unique building, adjacent to Kemp Hall, which is used for religious and social gatherings of various kinds. The reception room is artistically furnished and the kitchen well equipped.

The OBSERVATORY is a separate building equipped with three telescopes, a reflector and sextant.

The POWELL MONUMENT, dedicated to the memory of a distinguished professor, Major J. W. Powell, was erected by the Class of 1923. This monument, situated directly south of Hedding Hall, faces the HEDDING BELL MONUMENT, recently erected memorial which perpetuates the life of old Hedding College.

The HEATING PLANT, modern and recently remodeled, is located just north of Old North Hall and assures comfort and heat for the students in their classrooms and laboratories.
